MANY STORES

Holds your TV and VCR/DVD player; adjusts to the best angle for comfortable viewing.

Model#: 13449

Proposed locations

Dunlap Hallway

Newton Oakes lobby

HNS lobby

Barnes Hall lobby

Memorial Hall lobby

Price Memorial hallway

How will the requested technology support the education of NGCSU students?

The additional TVs will help to communicate important announcements and events to all students. Announcements could include such academic topics such as Advisement dates, registration dates, Drop/Add dates, Study skills, live tutoring. Announcements might also include emergency information from Public Safety, parking instructions, or the availability of flu shots.

NGTV will also provide an outlet to show academic assignments in a visual presentation. It will allow students to learn about mass communication.

Indicate who will have use of the requested technology and the approximate number of students involved.

The civilian residence halls currently have 10 common area televisions. The Parent's Association has recently agreed to add an additional 8 televisions to common areas within the residence halls. These TVs are available for approximately 890 residents and their guests.

The additional TVs will be placed in common areas to target commuter students. TVs will be placed in high areas so that the TVs can be kept on Channel 15, maximizing their effectiveness.

Signature of Requestor: _____

Date: _____

Section B:

If the requested technology will be housed in a particular department or program, the department head or program director must compete and sign this section.

What are your projections of the annual cost of maintenance and supplies? (i.e. Lab assistants, paper and toner, software licensing, etc.)

The projection for annual costs is \$0.

How will you allocate the necessary funds for maintenance and supplies?

N/A

What security procedures will be implemented for this technology?

The TVs will be placed in high areas and will be fastened to the ceiling and walls.
